

To a transplant Nurse:

I just want to thank you for all you do on a daily basis. I am a heart transplant recipient. During my two month hospital stay before my transplant, I was treated wonderful. My nurses did a great job of make a bad situation much better for me.

I was encouraged to hang in there because, better days were coming. They have a hard job most of their patients are going to die if a transplant does not come soon. So once again I am grateful for the experience of care and concern for me as an individual that was shown by my transplant nurses. So I am thanking all the transplant nurses for the wonderful job that they do through this letter to YOU.
