

*To A Transplant Nurse,*

*I want to thank you for choosing a profession that takes a lot of dedication with patients and their families following transplantation. Teaching them how to take care of the gift of life they have received after an organ donation is a special task given to Transplant Nurses.*

*I know how special you are to these people for I have seen Transplant Nurses in "action" at the University where I am employed. I also know how Special Transplant Nurses are because I was a charge nurse on the Transplant floor and would speak to the patients and their families they would tell me so.*

*I also am a Donor Sister. My sister Julie donated a Liver and both her Kidneys February 11, 2006 at UMass Memorial. I have heard from 2 recipients who have a second chance because of her.*

*Thank You for doing what you do.*

*Janet Harris*
