

*Dear Transplant Nurse:*

*I want to express my deep gratitude to you and your associate transplant nurses for all the great work that you do everyday for your patients. Being a transplant recipient, I experienced first hand how wonderful your contributions are to transplant patients. Your kindness and expertise make these traumatic experiences bearable as you instill confidence to those that are in your care.*

*I received a kidney at the University of Pennsylvania Hospital about two and one half years ago. I was fortunate to get a perfect match that came from Atlanta. I now enjoy my life spending time with my grand children, playing golf and volunteering for Gift of Life. Not bad for a 71 year old guy.*

*Again, I thank you from the bottom of my heart for all that you do for organ transplantation.*

*All the Best,  
Joe Richetti*
