

Dear Transplant Staff Member,

I would like to thank you for choosing to follow your heart into this very challenging profession. As a donor mother, I choose the word 'challenging' intentionally. As I look back to our experience in the hospital with my son Bob, I remember the kindness' shown to my family. Beyond compassion, the connection that some of your fellow nurses' shared in those never-ending yet brief two days - continues to hug my heart.

My prayers include you and all the dedicated staff who share in saving lives whether they are the recipients or donor families whose hearts and minds needed a few minutes and were granted them. Please remember a few minutes can (and often do) last a lifetime in the hearts and memories of the strangers that pass thru your life daily.

May you be aware of the angels that walk with you every day protecting and guiding you.

God Bless
Linda
