

Dear Transplant Nurse,

I would like to take this opportunity to express my most heartfelt appreciation for the amazing care, love and concern you showed me everyday of my life changing experience.

What you may consider routine is far from it in my eyes. I was blessed with your presence and you are truly an angel on earth.

Having received my first kidney/pancreas in 2004, if it could go wrong, it did, and yet through hundreds of days in the hospital and at last count, 9 surgeries, YCU became my surrogate family. Being 3 1/2 hours from home, my family couldn't always get there quickly and you stayed with me and made sure I was comfortable. I lost the first pancreas in March of 2005. Who in the wildest imagination would dream I would be blessed in August 2006 with a second pancreas. My entire family was comforted in knowing YCU would once again be by OUR side. I am humbled to the core. How did I ever deserve an amazing care giver such as you?

I thank God every single day that I had the amazing transplant team and YCU to see me through a journey NO ONE could anticipate. YCU are a true gift to your profession.

I have learned amazing life lessons from you, I shall spend the rest of my life paying it forward. It doesn't really seem enough, but I thank you from my heart.

Most Respectfully,

Marjorie A Robinson
