

Dear Transplant Nurses:

Please accept this thank you, on behalf of my entire family, for all you do for transplant patients.

My husband just received his second kidney transplant – both from living donors – myself in 1992 and now our daughter just three months ago. My whole family has been touched by the wonderful dedication of the nurses – the nurse coordinator, both for my husband for both transplants and the nurse coordinator for the living donors who coordinated the testing of me for the first transplant, and our three children who were tested for the most recent transplant and all were matches. Many transplant nurses touched our lives throughout the entire transplant experience – the OR nurses, the 20 transplant nurse who handled the medication issues, the pre OP and PACU nurses, the floor nurses post op, the transplant nurses in the clinic for the post op visits, the nurses who are on call for after hours issues, not to mention the dialysis nurse who took care of things pre transplant, and the list goes on and on. Without your help and wonderful care, this transplant would not have been possible and we cannot thank you enough.

*Best wishes and thank you again for all you do,
Spouse of a transplant patient and also a living kidney donor.*
