

*Dear Transplant Nurse,*

*As a liver transplant recipient I owe a debt of gratitude to all transplant nurses especially those at Columbia Presbyterian Medical Center in New York. I received a new liver and was hospitalized for 9 days including 5 in ICU.*

*The nurses on all three shifts were excellent and provided professional care, many with a personal touch. A nurse's shift is not easy and from what I observed the night shift in ICU was the most stressful due to reduced staff and patients that needed constant attention.*

*Questions were answered willingly and honestly and for me special attention was given to those asked by my wife, an RN. My wife and I are most appreciative of the nurses' patient care and patience.*

*Thanks again for being a transplant nurse.*

*My best regards,*

*Art Clark*
