

Dear Transplant Nurse,

We had so many nurses when Tyler was transplanted 8 years ago, and I was so thankful for them all and tried to tell them so at the end of each day. Here is my letter to you

We are so very thankful that you chose a career in nursing. Taking care of others before, during and after an organ transplant is surely a stressful, exhausting job. Yet all the nurses we encountered during our sons transplant journey always had a smile or encouraging word when we seemed to need it most. We commend you for what you do on a daily basis for all organ donors, recipients and their families. Thank you for taking such great care of those who need it!

Sincerely,

The Harrald Family - *Georgette*
